

Overview of Advantages

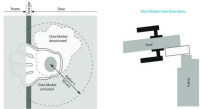

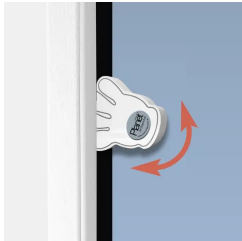

- Effective and low-cost finger protection for the main closing edge
- Fitted in in 2 minutes without screws, no drilling of the door leaf, leaves no screw holes after removal
- Easy to use and self-explanatory
- Can be permanently activated or deactivated
- Can be used for multiple purposes, e.g. also prevents unwanted slamming of the door
- Maintenance-free and durable
- Leaves no traces of wear on doors and frames
- Application field: Like the roller protectors and cover profiles from Planet, the Planet door blocker is suitable for child daycare centres and schools as well as retirement and convalescent homes, doctor's surgeries and private environment. (Warning: The Planet Door blocker FSH 9000 is not suitable for smoke and fire doors!)
